View our list of why installing an eating counter is a popular item in kitchen remodeling.

Installing An Eating Counter In Your Kitchen

- It is a great and informal way to spend time with your family while you are preparing meals in the kitchen. You will be surprised how food brings conversation and quality time with your loved ones together.
- An eating counter can be used for more than just eating. It is a great your guests at ease and creates a gathering area for conversation.
- Great for entertaining because it creates a space for people to sit and converse with you. It also allows you to work in the kitchen and still interact with your guests.
- Having an eating counter makes you feel like a chef, and lets you show off your cooking skills when entertaining your guests. It puts your guests at ease and creates a gathering area for conversation.
- The eating counter will become the most used space in the house, because it can be used as a casual dining area, it is convenient, easy to clean and low maintenance.
- With today's ever changing life styles and hectic schedules, it will become the main gathering place in the home, where you and your family will spend valuable time together.
- Choosing a low maintenance surface like granite, silestone, or avanza, makes cleaning quick and easy. A soft cloth with warm water and mild soap makes clean up a breeze, and placemats optional.
- Adds additional usable counter space in your kitchen by allowing you to place hot pots and baking items directly from the oven to the counter top.
- Provides extra seating when having large gatherings and parties.
- One of the most requested wants on a homeowners list when they are remodeling their kitchen. Add great re-sell value to any home and truly a great investment!
